SUB-SEASONAL TO SEASONAL FORECAST IN GHANA

Advisory

- For the 1st week, below normal rainfall is expected across most parts of the country. Road users should maintain safe following distances, reduce speed when visibility is poor and exercise caution, particularly on roads passing through dry and dusty areas.

- Above normal temperatures are expected across the country. The public is advised to stay hydrated and avoid prolonged exposure to direct sunlight during peak afternoon hours to minimize the risk of dehydration and heat-related illnesses.

- As the period progresses into the 2nd week, above normal rainfall is expected across the country, except in the Upper East, Upper West, North East regions, as well as parts of the Northern and Savannah regions – Residents are encouraged to keep drainage channels clear of refuse and avoid crossing flooded roads and waterways.

- Above normal temperatures are expected across the country – staying hydrated is advised.

- **The public is encouraged to stay informed by following daily weather updates from the Ghana Meteorological Agency.**
