18HOUR FORECAST FOR GHANA
VALID FROM 6 AM, 09/11/2026

SUMMARY: Thunderstorms or rain are expected over Sunyani, Berekum and their immediate surroundings this morning. Mist or fog patches may reduce visibility over parts of the western coast, mountainous and forest areas during the early hours. From mid-morning, sunny conditions will intensify across much of the country, leading to hot and scorching conditions. Later in the afternoon, occasional cloudiness may trigger thunderstorms without or without rain for some areas within the middle, transition and northern sectors persisting into the evening. Slight haze is expected over the extreme Upper East and North East regions later in the day.
