SUB-SEASONAL TO SEASONAL FORECAST IN GHANA

Advisory

- For the 1st week, below normal rainfall is expected across most parts of the country - Drivers are advised to exercise caution on dusty roads, reduce speed where visibility is poor and maintain safe following distances..
- Above normal temperatures are expected across the country. The public is advised to stay hydrated and avoid prolonged exposure to direct sunlight during peak afternoon hours to minimize the risk of dehydration and heat-related illnesses.

- As the period progresses into the 2nd week, above normal rainfall is expected across the Northern sector and the Transition zone – Road users are advised to exercise caution on wet and slippery roads, reduce speed, maintain safe following distances and avoid driving through flooded areas.
- Below normal rainfall is expected across the Southern sector of the country – Individuals are advised to store water whenever it rains and ensure prudent use of available water. Also, increased dust levels may affect air quality and aggravate respiratory conditions. Individuals, particularly children, the elderly and persons with existing respiratory conditions, are encouraged to limit prolonged exposure to dusty environments.

- Above normal temperatures are expected across the country – staying hydrated is advised.

- **The public is encouraged to stay informed by following daily weather updates from the Ghana Meteorological Agency.**
