SUB-SEASONAL TO SEASONAL FORECAST IN GHANA

Advisory

- For the 1st week, above normal rainfall is expected across most parts of the country. The public, particularly residents in flood-prone and low-lying communities, is advised to take precautionary measures against possible flooding during periods of increased rainfall.
- Above normal temperatures are expected across the country. Individuals are advised to stay hydrated and avoid prolonged exposure to direct sunlight during peak afternoon hours to minimize the risk of dehydration.

- As the period progresses into the 2nd week, below normal rainfall is expected across the country, except in the Upper East, Upper West, North East regions, and parts of the Northern and Savannah regions – Drivers are urged to exercise caution on dusty roads, reduce speed where visibility is poor and maintain safe following distances.
- Above normal temperatures are expected across the country – staying hydrated is advised.

- **The public is encouraged to stay informed by following daily weather updates from the Ghana Meteorological Agency.**
