### WEATHER SUMMARY

The country's maritime space is expected to experience variable cloud cover throughout the week, with occasional sunshine in the afternoon. However, cases of isolated thunderstorms and rains anticipated over onshore and offshore areas during the forecast period. The state of the sea is expected to be rough from the beginning of the forecast and gradually become dangerous from Thursday to Friday.

**NB: Dangerous sea states are expected across the marine space on Thursday and Friday, with strong winds, particularly along the central and east coasts.**
