

## 24-HOUR IMPACT-BASED FORECAST FOR GHANA

**Weather Forecasting Risk Table**

Likelihood ↑	High (>60%)	<b>G</b>	<b>H</b>	<b>I</b>
	Medium (40% - 60%)	<b>D</b>	<b>E</b>	<b>F</b>
	Low (<40%)	<b>A</b>	<b>B</b>	<b>C</b>
		Low	Medium	High
		← Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
<b>Coast</b>	<b>24</b>	<b>33</b>
<b>Forest</b>	<b>23</b>	<b>35</b>
<b>Transition</b>	<b>22</b>	<b>36</b>
<b>Northern</b>	<b>23</b>	<b>40</b>

**SUMMARY:** Mostly cloudy weather will prevail over most places within the country overnight. The thunderstorms with or without rain already affecting parts of the transition and middle sectors will continue and extend to additional areas within these sectors. Isolated thunderstorms with or without rain are, however, anticipated over the coast and a few inland areas. Early tomorrow morning, mist or fog patches are likely to form over mountainous and forest zones. As the day progresses into the afternoon, sunny weather will dominate across much of the country with rain and thundery activities expected over parts of the middle and transition sectors from the late afternoon hours.
