Northern	26	41

SUMMARY: A moderate rainstorm situated at the border of Togo and Benin is making a westward propagation towards Ghana. The rainstorm is expected to induce cloudiness and produce thunderstorms or rain of varying intensities over parts of the coast, middle and transition sectors from this morning into the afternoon. As the day progresses, periodic sunshine is expected to alternate with cloud cover across all sectors. However, from the late afternoon hours into the evening, thunderstorms or rain are anticipated over portions of the middle, transition and northern sectors.
