Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	25	33
Forest	24	35
Transition	23	36
Northern	27	41

SUMMARY: Early this morning, mist or fog patches are expected to form within the forested and mountainous areas, potentially reducing visibility. Thereafter, sunny conditions with intermittent cloudiness will dominate across the country. Nevertheless, from mid-afternoon into the evening, thunderstorms or rain of varying intensities are likely to affect parts of the middle sector, a few inland coastal areas, and the transition belt.
