Rain	Wind	Dust	Hail	Mist	Fog

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	21	32
Forest	22	33
Transition	20	33
Northern	24	35

**SUMMARY:** Thunderstorms or rain of varying intensities will persist over most places within southern Ghana amidst mostly cloudy conditions during the night hours. A rainstorm currently observed over the northern borders of Togo and Benin is also expected to move westwards and produce rainfall activities over portions of the north. Places to be affected include: **Bolgatanga, Bawku, Sakogu, Gbintiri, Pina, Nalerigu** and surrounding communities. Early tomorrow morning, mist or fog may reduce visibility in some forest, hilly and coastal areas. Also, there are chances of slight to moderate rain over a few coastal and inland areas during the morning hours. Later in the day, parts of southern Ghana are likely to experience rain and thunderstorm.
