Urgency: Immediate

Severity: Severe

Certainty: Observed

Issued:

Fri 22 May 2026
13:31

Effective:

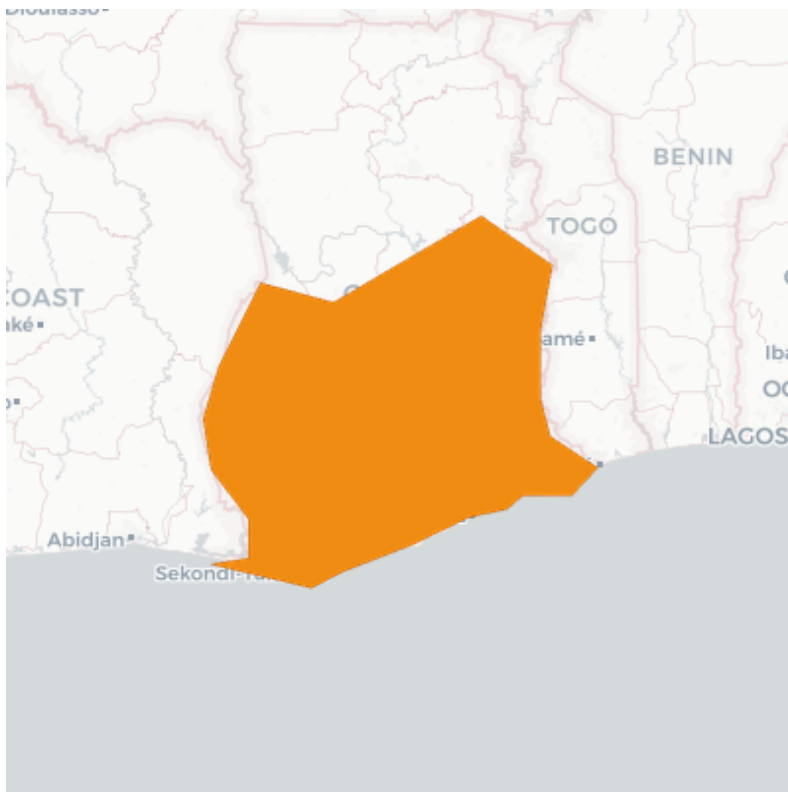

Fri 22 May 2026
13:31

Onset:

Fri 22 May 2026
13:35

Expires:

Fri 22 May 2026
19:30

Area:

Southern Ghana

Description:

A moderate rainstorm that propagated into Ghana in the early hours of the day is currently casting cloudy conditions while producing varying intensities of thunderstorms and rainfall activities over parts of coast and the forest belt.. The rainstorm is currently engulfing the eastern portions of the country and it is expected to intensify while spreading across other areas over southern Ghana.

Instruction:

Windy conditions are likely to be experienced over some areas so stay indoors if you don't need to go outside. Motorist and pedestrians are advised to avoid moving through flood waters especially over low lying areas to prevent any form accidents.
