24-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	33
Forest	23	34
Transition	22	35
Northern	25	37

SUMMARY: Partly cloudy conditions are expected to prevail over most parts of the country tonight. However, a weak to moderate rainstorm observed over northern Benin is moving westward and is anticipated to trigger thunderstorms or rain over parts of the northern sector and portions of the transition zone. In addition, a few areas along the coast and nearby inland areas are likely to experience thunderstorm or rain. During the early morning hours, patches of mist or fog will form over parts of the coastal, forest, and mountainous areas, which may lead to reduced visibility.
