

Warning: Moderate to Heavy Rains within Southern Ghana and parts of the north

Urgency: Immediate

Severity: Severe

Certainty: Observed

Issued:

Thu 11 Jun 2026
06:32

Effective:

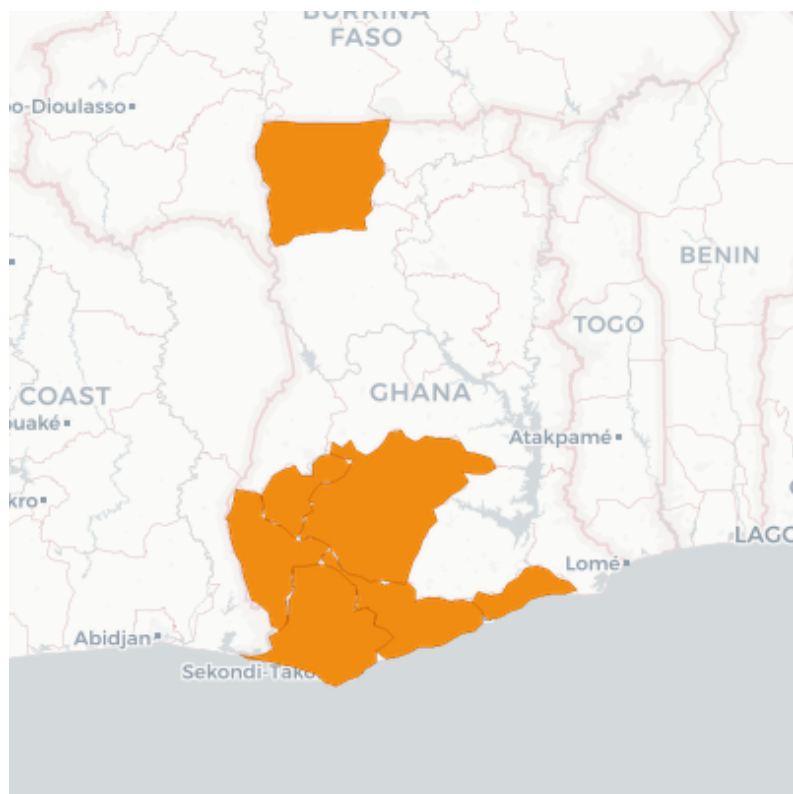

Thu 11 Jun 2026
06:30

Onset:

Thu 11 Jun 2026
06:30

Expires:

Thu 11 Jun 2026
12:00

Area:

Greater Accra, Central, Ashanti, Western North, Western, Ahafo, Upper West

Description:

The rainstorm in the earlier alert has engulfed most parts of southern Ghana. The effects of the storm are expected to persist this morning and produce moderate to heavy rains within the Greater Accra, Ashanti, Western, Western North, Ahafo and Central regions. Flash floods are likely to occur within the low lying areas. A separate rainstorm is approaching the upper west region and is expected to produce moderate to heavy rains with thunder over Tumu, Hamile, Nandom, Jirapa and surroundings this morning

Instruction:

Residents in the affected regions are advised to take precautionary measures ahead of the approaching rains. Avoid outdoor activities during heavy downpours, and stay clear of flooded roads and waterways. Kindly stay updated through official weather bulletins and alerts from the Ghana Meteorological Agency (GMet)
