WEATHER SUMMARY

Patchy cloud cover with sunny spells in the afternoons is expected to dominate the marine space of the country during the forecast period. Thunderstorms are 60% likely at the beginning of the week over the entire zone and are expected to recede by midweek, affecting the west coast the most. Meanwhile, the sea state, as expected for the season, will remain rough, increasing slightly at the end of the week, with an average sea temperature of 28°C.
