18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table

Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High

← Impact →

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	21	31
Forest	22	32
Transition	22	33
Northern	26	34

SUMMARY: As stated in the earlier weather update, the rain bearing clouds currently producing thunderstorms and rain across parts of the northern sector will continue to affect additional areas within the northern and the transition sectors tonight. In addition, some areas in the middle and the coastal sectors may also experience rain and thundery activities. Early tomorrow morning, mist or fog patches will develop over the coastal, hilly and forest zones. Later in the day, from the afternoon into the evening, thunderstorms or rain are likely to occur in parts of the southern half of the country.
