**WEATHER SUMMARY:** Mostly cloudy weather conditions are expected to prevail across the country's marine space, reducing visibility significantly for much of the forecast period. However, there is a 40 - 60% chance of scattered light to moderate rainfall mainly during the morning hours and into the afternoon, affecting both coastal and offshore regions, particularly in the central and east coast areas.

**NB:** Strong winds will persist offshore from morning into the afternoon. In line with seasonal conditions, rough seas are anticipated throughout the entire forecast period.
