18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	31
Forest	22	32
Transition	21	33
Northern	25	35

SUMMARY: Tonight, partly cloudy conditions are expected to prevail across the country with intermittent rain over parts the coast and some inland areas. A moderate rainstorm observed over Benin is expected to move westwards and trigger thunderstorms and rain to affect the eastern portions of the country during the night into the morning. During the early hours of the morning, mist or patches of fog are likely to form over the mountainous and forest regions leading to reduced visibility.

SIGNED: Central Analysis and Forecasting Office (CAFO)
