Forest	22	31
Transition	22	34
Northern	24	35

SUMMARY: The rain-bearing clouds currently affecting the southeastern parts of the country are expected to persist, producing rain with occasional thunder of varying intensities. As the day progresses, these clouds are also expected to spread westward, bringing thunderstorms or rain to the southwestern parts of the country from this afternoon into the evening. Northern Ghana will experience intervals of sunshine. However, thunderstorms or rain are expected over parts of the northern sector from late afternoon into the evening.
