

18-HOUR FORECAST FOR GHANA

VALID FROM 6PM, 01/07/2026

SUMMARY: Chances of intermittent **slight to moderate rain or drizzle** exists this evening into the night over places within the southern part of Ghana. Portions of the northern sector will also be affected by isolated thunderstorms or rain of varying intensities. However, the early hours of tomorrow morning will be predominantly cloudy with **intermittent slight to moderate rain or drizzle** over portions of the coastal and the middle sectors. Formation of mist and fog patches are expected to reduce visibility range as well over forest and hilly areas.
