Transition	21	35
Northern	17	38

SUMMARY

Partly cloudy conditions are expected over most places of the country this morning becoming sunny as the day progresses. There are chances of localized thunderstorm or rain over some few areas in the southern sector from late afternoon into the evening. However, Northern Ghana is expected to be dominated by slightly hazy and relatively dry conditions throughout the forecast period. Early morning visibility will be affected over the mountainous and forest areas due to the formation of fog and misty patches
