Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	32
Forest	22	32
Transition	22	32
Northern	25	35

SUMMARY: Early this morning, chances of isolated slight rains are expected for the coast and forest belt while portions of the transition belt experiences isolated thunderstorms or rain. Meanwhile, mist and fog patches are expected to reduce visibility range during this period. As the day progresses, brief spells of sunshine are anticipated to prevail for most places in the country with the likelihood of thunderstorms and rain of varying intensities occurring over parts of the coast, middle, transition and northern sectors.
