Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	31
Forest	24	32
Transition	23	33
Northern	24	36

SUMMARY: A weak to moderate rainstorm sighted along the north of Togo and Ghana is anticipated to propagate westward to induce cloudiness and trigger thunderstorms with rain over parts of the northern Ghana from this morning into the afternoon. Early morning mist or fog patches are likely to develop over coast, forest and mountainous areas which will reduce visibility. As the day progresses sunny intervals will dominate the country with thunderstorms or rain expected over parts of the coast and the inland areas from late afternoon into the evening.
