| Sector     | Minimum Temperature (°C) | Maximum Temperature (°C) |
|------------|--------------------------|--------------------------|
| Coast      | 23                       | 30                       |
| Forest     | 22                       | 31                       |
| Transition | 22                       | 32                       |
| Northern   | 25                       | 34                       |

**SUMMARY:** The rainstorm highlighted in the *earlier weather update* is currently producing thunderstorms with slight to moderate rainfall amidst cloudy conditions over parts of the northern sector. The rainfall is expected to extend into parts of the middle and transition sectors from the afternoon into the evening hours. Over the coastal sector, periods of cloudiness and brief sunny spells are expected, with *occasional slight rain or drizzle*.
