18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	
			High

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	31
Forest	24	32
Transition	23	33
Northern	24	36

SUMMARY: The day will begin with patches of mist or fog over some coastal, mountainous, and forest areas, which may reduce visibility. As the morning gives way to the afternoon, a mixture of sunshine and clouds is expected across most places in the country. A few coastal areas may see brief spells of slight rain or drizzle during the afternoon. Later in the day, from late afternoon into the evening, isolated thunderstorms or rain are likely over parts of the forest, transition, and northern sectors.

SIGNED: Central Analysis and Forecasting Office (CAFO)
