

18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	30
Forest	23	32
Transition	22	33
Northern	24	34

SUMMARY: This morning, parts of the northern half of the country are expected to experience thunderstorms or rain of varying intensities. Meanwhile, southern Ghana will remain under mostly cloudy conditions, with mist or fog patches forming over the coastal, forest, and mountainous areas during the early hours. As the day progresses into the afternoon, sunshine with occasional cloud cover will prevail across the country. However, thunderstorms or rain are still likely over parts of the northern sector and a few areas within the transition belt.
