

18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	28
Forest	23	29
Transition	22	30
Northern	24	32

SUMMARY: Early morning, mist or fog patches are expected over parts of the coast, forest, and mountainous areas which will reduce visibility, while the rest of the country remains mostly cloudy. As the day progresses, most areas will experience a mixture of sunshine and clouds, with isolated rain over parts of the middle and the northern sectors from late afternoon into the evening.

NB: A rainstorm observed over the northern Nigeria and Benin is propagating slowly and westwards which is expected to induce cloudiness and produce thunderstorms with rain over parts of northern Ghana.

SIGNED: Central Analysis and Forecasting Office (CAFO)
