

18-HOUR IMPACT-BASED FORECAST FOR GHANA

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	30
Forest	23	30
Transition	22	32
Northern	24	33

SUMMARY: The weather over Ghana this morning will be dominated by mostly cloudy conditions with mist and fog patches forming to reduce visibility range over parts of the coast, forest and mountainous areas. There are chances of pockets of slight rain or drizzle to affect few coastal and forested areas whiles the upper regions are likely to be affected by isolated thunderstorms or rain. As the day unfolds into the afternoon, variably cloudy weather with sunny intervals will be dominant with possibility of late afternoon thunderstorms with rain over places in the transition and northern belts.
