

## 18-HOUR IMPACT-BASED FORECAST FOR GHANA

| Weather Forecast Risk Matrix |                    |          |        |      |
|------------------------------|--------------------|----------|--------|------|
| Likelihood ↑                 | High (> 60%)       | G        | H      | I    |
|                              | Medium (40% – 60%) | D        | E      | F    |
|                              | Low (< 40%)        | A        | B      | C    |
|                              |                    | Low      | Medium | High |
|                              |                    | Impact → |        |      |

| Weather Icons |      |      |     |      |      |
|---------------|------|------|-----|------|------|
|               |      |      |     |      |      |
| Rain          | Wind | Dust | Fog | Hail | Mist |

| Sector     | Minimum Temperature (°C) | Maximum Temperature (°C) |
|------------|--------------------------|--------------------------|
| Coast      | 24                       | 27                       |
| Forest     | 23                       | 26                       |
| Transition | 22                       | 26                       |
| Northern   | 25                       | 29                       |

**SUMMARY:** Mostly cloudy conditions will prevail across the country this evening. A few places in the middle and transition sectors may experience slight rain or drizzle, while isolated thunderstorms or rain are expected over parts of the northern sector. Early tomorrow morning, patches of fog or mist are likely to develop over some coastal, forest, and mountainous areas.

**NB:** *Relatively cool night and early morning temperatures are expected across the country.*
