

18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	22	29
Forest	21	30
Transition	23	31
Northern	23	32

SUMMARY: The weather over the country is expected to be predominantly cloudy across the entire country for much of the day. However, the early hours of the morning are expected to be dominated by misty or foggy conditions over the forest and hilly areas as well portions of the coastline. Meanwhile, *intermittent slight rain or drizzle* exist for some parts of the coast and the middle sector this morning and during the afternoon hours whiles isolated thunderstorms or rain are likely to affect parts of the northern and transition belts later into the evening.

NB: *Relatively cool night and early morning temperatures are expected across the country.*
