

18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	
		High	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	30
Forest	24	30
Transition	23	31
Northern	25	33

SUMMARY: Mostly cloudy conditions will prevail across southern Ghana this morning, with mist or fog patches likely over some coastal, forest and mountainous areas. There is also a chance of slight rain or drizzle, particularly over parts of the forest and mountainous zones. As the day progresses, intervals of sunshine and cloudy conditions are expected across most places within the country. From late afternoon into the evening, thunderstorms or rain are likely to develop over parts of the middle, transition and northern sectors.

NB: *Relatively cool night and early morning temperatures are expected across the country.*
