18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	29
Forest	24	30
Transition	23	31
Northern	25	33

SUMMARY: Mist or fog patches will form over parts of the coast, forest and mountainous areas during the early hours of the day amidst mostly cloudy conditions. A few places within southern Ghana may also experience slight rain or drizzle. Sunny weather with occasional cloudiness will prevail over parts of the country as the day progresses. However, from late afternoon into the evening, cases of thunderstorms or rain are likely to affect parts of the middle, transition and northern sectors.

NB: *Relatively cool night and early morning temperatures are expected across the country.*

SIGNED: Central Analysis and Forecasting Office (CAFO)
