Coast	24	27
Forest	23	27
Transition	22	27
Northern	24	28

SUMMARY: Generally, mostly cloudy weather will prevail across the country this evening into the night. Increased cloud cover, alongside thunderstorms with or without rain of varying intensities, is expected over parts transition and northern sectors this evening into the night hours due to the steady westwards movement of a moderate rainstorm observed over northern Togo and Benin. Early tomorrow morning, mist or fog patches are likely to develop along the coast, mountainous and forest zones, which may affect visibility.

NB: Relatively cool night and early morning temperatures are expected across the country.
