

18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	29
Forest	23	31
Transition	22	31
Northern	23	33

SUMMARY: Places within Upper West and the Savannah regions will continue to be affected by the rainstorm with thunderstorms and rain of varying intensities during the morning hours. Portions of the transition belt are expected to be affected by the rainstorm. However, mostly cloudy conditions will prevail over other areas in the country this morning with mist and fog patches forming over places along the coast, forest and mountainous areas in the early hours. Sunny intervals is expected to be experienced over most areas during the afternoon hours with isolated thunderstorms or rain over the transition and northern sectors.

NB: *Relatively cool night and early morning temperatures are expected across the country.*
