18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	29
Forest	23	31
Transition	22	31
Northern	23	32

SUMMARY: Partly cloudy to mostly cloudy conditions will dominate most areas across the country tonight. Mist or fog patches will form during the early morning hours over parts of the forest, coastal and mountainous areas, potentially reducing visibility. As the day progresses variably cloudy weather with a mix of sunshine will be experienced. Parts of the transition and the north are likely to be affected by the thunderstorms or rain late afternoon into the evening.

NB: *Relatively cool night and early morning temperatures are expected across the country.*

SIGNED: Central Analysis and Forecasting Office (CAFO)
