18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	29
Forest	23	31
Transition	22	31
Northern	23	32

SUMMARY: Early morning mist or fog patches are expected to form over parts of the coast, forest and mountainous areas amidst mostly cloudy conditions. A few places within southern and northern Ghana may also experience slight to moderate rains. Variably cloudy with intervals of sunshine will prevail over parts of the country as the day progresses. However, from the afternoon into the evening, thunderstorms with rain may affect some areas in the coast and the inland parts of the country.

NB: A rainstorm observed over the northern Benin and Togo is propagating slowly and westwards which is expected to induce cloudiness and produce thunderstorms with rain over parts of northern Ghana.

NB: Relatively cool night and early morning temperatures are expected across the country.
