Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	22	28
Forest	21	29
Transition	22	29
Northern	23	31

SUMMARY: Over the northern sector, the rainstorm mentioned in the earlier updates of today though it has currently weakened, it is still expected to increase cloud cover while producing thunderstorms or rain of varying intensities as it continues its steady westward movement. Variably cloudy will be observed across most areas in southern Ghana with the likelihood of slight rain or drizzle.

NB: Relatively cool night and early morning temperatures are expected across the country.
