

GHANA METEOROLOGICAL AGENCY

SUMMARY

- In this dekad, **Kpando** recorded the highest rainfall accumulation of 119.5mm across the entire country, whereas **Dunkwa** recorded 2.0mm as the lowest rainfall accumulation. Generally, the country recorded rainfall deficits during the dekad, except for places such as **Babile, Wa, Bole, Damongo, Bui, Kintampo, Kpando, Ho, Accra, Tema, Tarkwa, Cape Coast, and Half Assini** which recorded rainfall surpluses relative to their dekadal climatology (1991–2020) (refer to Map 2).
- **Wa** and its environs recorded 31.4°C as the highest average maximum temperature, whereas **Abetifi** and its environs recorded 26.2°C, as the lowest average maximum temperature across the entire country. Generally, warmer average daytime temperatures were recorded across the country except **Akim Oda, Koforidua, Akuse, Akatsi, Axim, Takoradi** and their environs, which recorded cooler daytime temperatures as compared to their dekadal climatological means (1991-2020) (refer to Map 4).
- **Abetifi** and its environs recorded 20.7°C as the lowest average minimum temperature, whereas **Kete-Krachi** and its environs recorded 24.5°C as the highest average minimum temperature across the entire country. The entire **country** recorded warmer night-time temperatures except for **Accra** and its environs, which recorded cooler average night-time temperatures as compared to their dekadal climatological means (1991-2020) (refer to Map 6).

In the Next ten (10) days,

- Generally, the **country** is expected to record below normal rainfall except for the **Upper West, Upper East, and North East regions** with their environs which are likely to experience normal rainfall conditions.
- Generally, the **country** is expected to record above normal temperatures with the exception of **areas along the Coast** which are likely to record below normal temperatures.

1.0 CLIMATIC ASSESSMENT (JULY 3RD DEKAD 2026)

1.1 RAINFALL AMOUNT

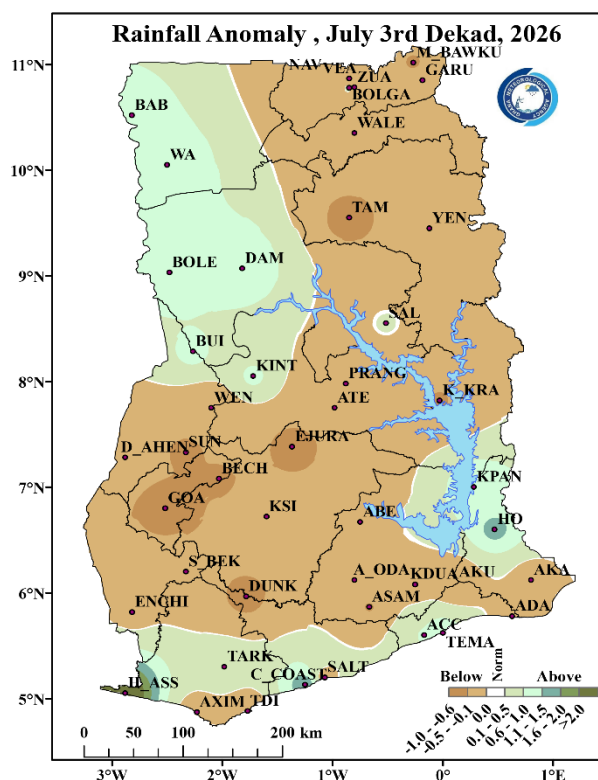

In this dekad, Kpando recorded the highest rainfall accumulation of 119.5mm across the entire country, whereas Dunkwa recorded 2.0mm as the lowest rainfall accumulation.

Bui recorded 52.6mm, the highest within the Transition zone. In the West Coast, Half Assini and Axim recorded 84.1mm, and 17.5mm respectively. Bechem recorded no rainfall amount.

Generally, the country recorded rainfall deficits during the dekad, except for places such as Babile, Wa, Bole, Damongo, Bui, Kintampo, Kpando, Ho, Accra, Tema, Tarkwa, Cape Coast, and Half Assini which recorded rainfall surpluses relative to their dekadal climatology (1991–2020). Salaga and its environs recorded normal conditions.

Map 2: Rainfall Anomaly Map.

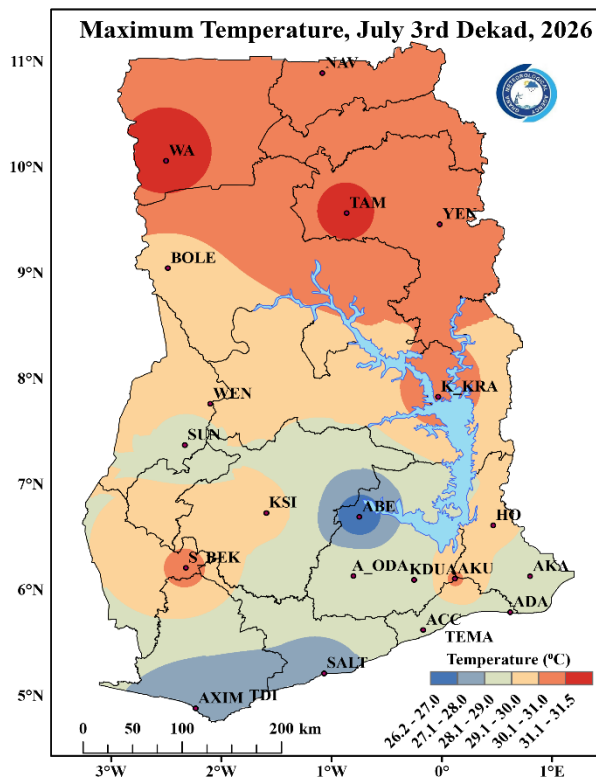

1.2 MAXIMUM TEMPERATURE

The highest average maximum temperature of 31.4°C for the dekad was recorded in Wa and its environs, whereas Abetifi and its environs recorded 26.2°C, the lowest average maximum temperature across the entire country.

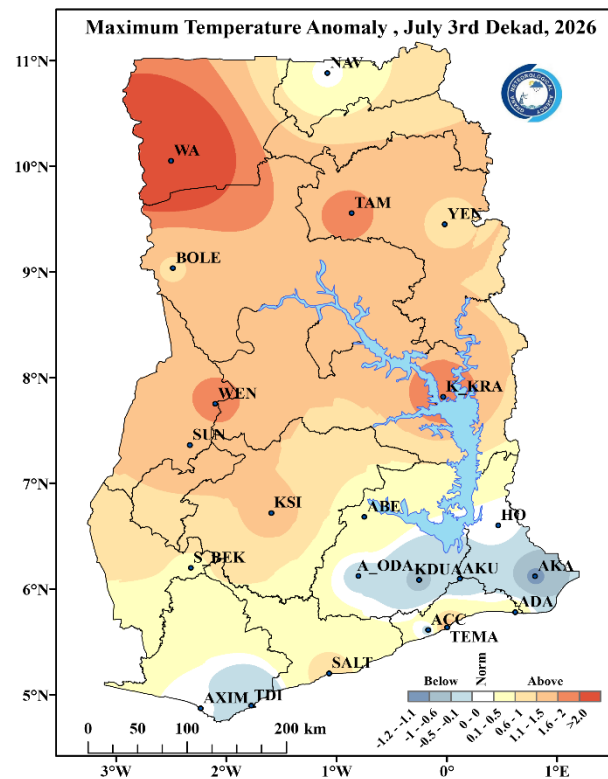

Kete-Krachi recorded 30.5°C as the highest in the Transition zone. Sefwi Bekwai, Akuse and Kumasi within the Forest zone recorded 30.3°C, 30.2°C, and 29.3°C respectively. Ada recorded 28.5°C as the highest average maximum temperature along the Coast.

Generally, warmer average daytime temperatures were recorded across the country except Akim Oda, Koforidua, Akuse, Akatsi, Axim, Takoradi and their environs, which recorded cooler daytime temperatures as compared to their dekadal climatological means (1991-2020).

Navrongo and Ho recorded normal conditions.

Map 3: Maximum Temperature Map.

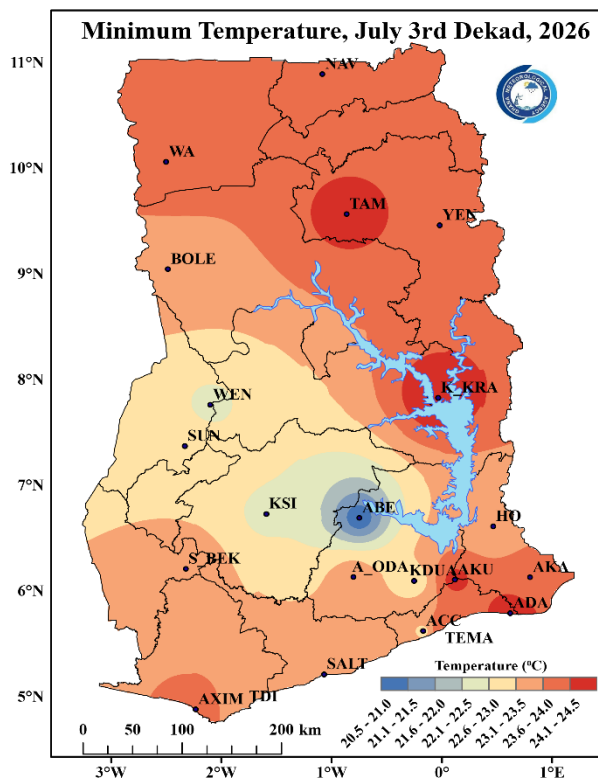

Map 4: Maximum Temperature Anomaly Map.

1.3 MINIMUM TEMPERATURE

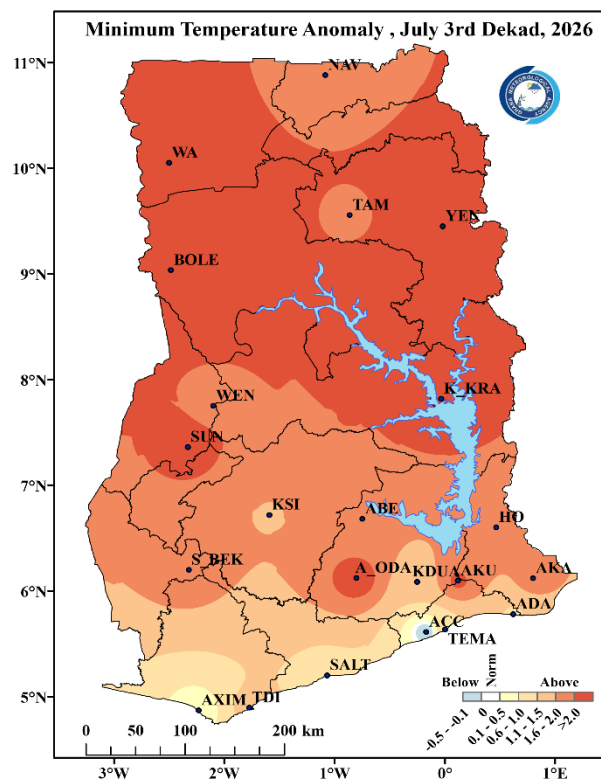

The country recorded average minimum temperatures between 20.0°C and 25.0°C. Abetifi and its environs recorded 20.7°C as the lowest average minimum temperature, whereas Kete-Krachi and its environs recorded 24.5°C as the highest average minimum temperature across the entire country.

In the Northern sector, Tamale recorded 24.2°C as the highest within the sector. Along the Coast, Ada, Tema, and Axim (with their environs) recorded 24.4°C, 24.0°C, and 23.8°C respectively.

Generally, the entire country recorded warmer night-time temperatures except for Accra and its environs, which recorded cooler average night-time temperatures as compared to their dekadal climatological means (1991-2020).

2.0 RAINFALL AND TEMPERATURE OUTLOOK FOR AUGUST 1ST DEKAD 2026

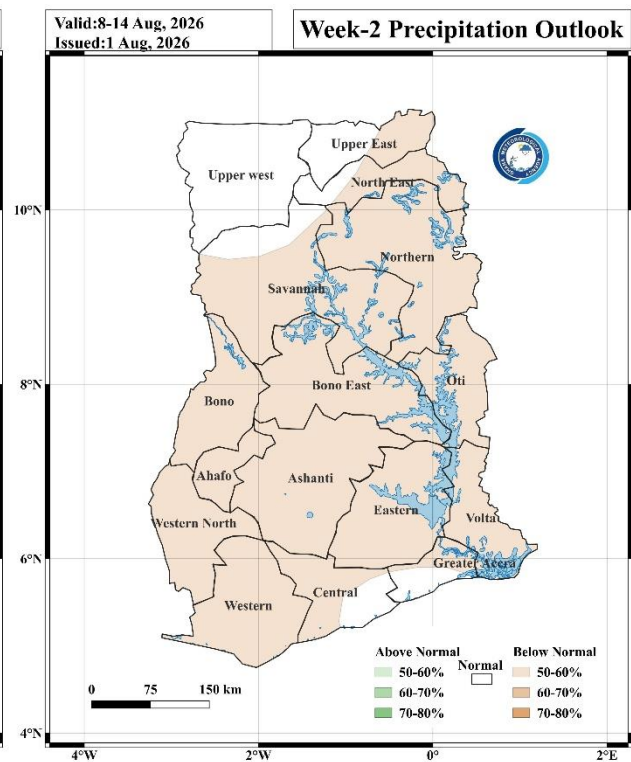

2.1 RAINFALL OUTLOOK

Week 1: Generally, the country is expected to record below-normal rainfall, except for the Upper West, Upper East, and North-East regions and their environs, which are likely to experience normal rainfall conditions.

Week 2: The country is expected to record below-normal rainfall except for the Upper West, Upper East regions, and the East Coast with their environs, which are likely to experience normal rainfall conditions.

Map 7: Rainfall Outlook for Week 1

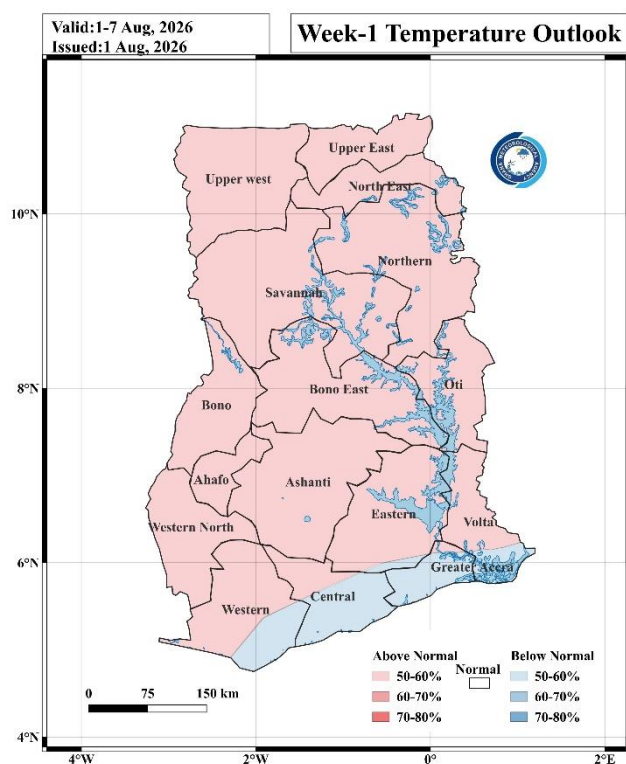

Map 8: Rainfall Outlook for Week 2.

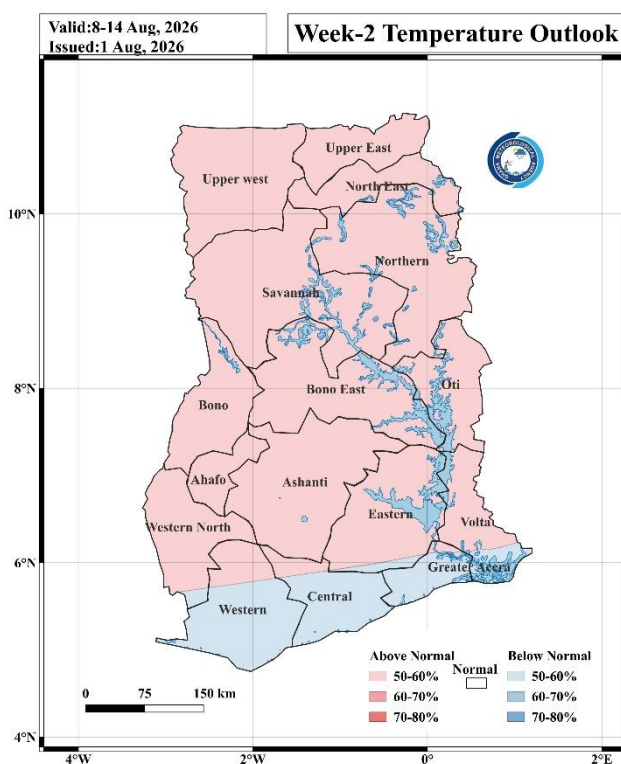

2.2 TEMPERATURE OUTLOOK

Week 1: Generally, the country is expected to record above normal temperatures with the exception of areas along the Coast which are likely to record below normal temperatures.

Week 2: The country is expected to record above normal temperatures whereas along the Coast and inland areas are likely to record below normal temperatures.

Map 9: Temperature Outlook for Week 1.

Map 10: Temperature Outlook for Week 2.
