Certainty: Observed

Issued:

Wed 19 Aug 2026
02:43

Effective:

Wed 19 Aug 2026
02:43

Onset:

Wed 19 Aug 2026
02:00

Expires:

Wed 19 Aug 2026
09:30

Area:

Ejura-Sekyedumase, Sekyere Central, Sekyere Afram Plains North, Offinso North, Ahafo Ano South West, Ahafo Ano North, Bono East, Upper East, Savannah, Northern, Oti, Upper West, Northern East, Bono, Ahafo

Description:

A moderate to heavy rainstorm (Squall line) approaching the northern sector from Benin and Togo is expected to initially produce thunderstorms and rain of varying intensities over the north eastern portions of Ghana before drifting westwards to affect the western parts. Areas likely to be affected by the rainstorm include Upper East, North East,

Northern, Savannah and Upper West regions. Portions of the transition belt, Oti, , Bono regions and the northern fringes of Ashanti region are likely to be affected as well. Gusty winds are likely to accompany the rainstorm.

Instruction:

Residents are advised to take necessary precautions during the storm. Seek shelter during heavy rain and lightning, avoid open areas and isolated trees, and exercise caution while driving due to poor visibility and slippery roads. Stay updated with official information from the Ghana Meteorological Agency. In an emergency, contact NADMO on 0302 964 884 / 0291 913 077 or dial 112.
