## 18-HOUR IMPACT-BASED FORECAST FOR GHANA

| Weather Forecasting Risk Table |                    |          |        |
|--------------------------------|--------------------|----------|--------|
| Likelihood ↑                   | High (>60%)        | G        | H      |
|                                | Medium (40% - 60%) | D        | E      |
|                                | Low (<40%)         | A        | B      |
|                                |                    | Low      | Medium |
|                                |                    | Impact → |        |

| Sector     | Minimum Temperature (°C) | Maximum Temperature (°C) |
|------------|--------------------------|--------------------------|
| Coast      | 23                       | 30                       |
| Forest     | 22                       | 31                       |
| Transition | 22                       | 32                       |
| Northern   | 24                       | 32                       |

**SUMMARY:** Early this morning, mist or fog patches are expected over parts of the forest, mountainous and coastal areas, leading to reduced visibility. Mostly cloudy conditions will prevail across all sectors, with a few places likely to experience rain. Later in the day, clouds will give way to intervals of sunshine over most areas. However, rain and thunderclouds may form in some areas in the transition and northern sectors later in the afternoon and the evening hours.

**NB:** *Relatively cool night and early morning temperatures are expected across the country.*
