

18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	
		High	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	23	29
Forest	23	31
Transition	23	31
Northern	24	32

SUMMARY: Misty or foggy conditions are expected over some areas within the coastal, mountainous and forest zones this morning, with slight rain or drizzle possible in a few places. A few areas within the transition belt may also experience rain during the morning hours. As the day progresses, a mixture of sunshine and cloudiness will prevail across the country during the afternoon. From the late afternoon into the evening, thunderstorms with rain are anticipated over parts of the northern, transition and middle sectors.

NB: *Relatively cool night and early morning temperatures are expected across the country.*
