**Temperature:** Generally, the country is expected to record above normal temperatures. Areas along the Coast, are expected to record below normal rainfall.

## SUB-SEASONAL TO SEASONAL FORECAST IN GHANA

### Advisory

- For the 1<sup>st</sup> week, below normal rainfall is expected across most across the country - store water for essential domestic and other daily activities. Individuals within the Bono region, which are likely to record above normal rainfall, should take precautionary measures against possible flooding, particularly in low-lying areas.
- The country is expected to record above normal temperatures, which calls for adequate hydration and limited sun exposure during peak afternoon hours.
- As the period progresses into the 2<sup>nd</sup> week, below normal rainfall is expected across the country. Above normal temperatures will persist over the rest of the country – staying hydrated is advised. Meanwhile, a notable cooling shift is expected, with below-normal temperatures spreading across the coastal sector — warm clothing is advised, particularly during early mornings and evenings.
- **The public is encouraged to stay informed by following daily weather updates from the Ghana Meteorological Agency.**
