SUB-SEASONAL TO SEASONAL FORECAST IN GHANA

Advisory

- For the 1st week, below normal rainfall is expected across most parts of the Southern sector. Individuals are advised to store water whenever it rains and ensure prudent use of available water.
- The country is expected to record above normal temperatures, which calls for adequate hydration and limited sun exposure during peak afternoon hours.
- As the period progresses into the 2nd week, below normal rainfall is expected in most parts of the Southern sector and the upper parts of the Northern sector. Above normal temperatures will persist over the rest of the country – staying hydrated is advised.
- **The public is encouraged to stay informed by following daily weather updates from the Ghana Meteorological Agency.**
