

18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table			
Likelihood ↑	High (>60%)	G	H
	Medium (40% - 60%)	D	E
	Low (<40%)	A	B
		Low	Medium
		Impact →	

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	30
Forest	23	32
Transition	24	32
Northern	25	34

SUMMARY: Generally, cloudy mostly cloudy weather is expected for most places in the country this morning with mist and fog patches forming over places along the coast, forest and hilly areas to reduce visibility range. There are chances of isolated rain or intermittent slight rain or drizzle over the coast and middle sector. However, the weather is expected to advance to mostly sunny conditions with periodic clouds across all sectors with chances of thunderstorms or rain of varying intensities over the inland areas of the coast stretching into the middle transition and northern sectors from late afternoon into the evening hours.

NB: Early morning and night temperatures are expected increase across the country.
