18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecasting Risk Table				
Likelihood ↑	High (>60%)	G	H	I
	Medium (40% - 60%)	D	E	F
	Low (<40%)	A	B	C
		Low	Medium	High
		Impact →		

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	24	31
Forest	23	32
Transition	23	32
Northern	23	34

SUMMARY: A weak to moderate thunder and rain bearing cloud observed in the north is currently inducing cloudiness, windy conditions over some places while producing thunderstorms with rain of varying intensities which is expected to persist into the night and into early morning hours. Few areas in the transition belt are likely to experience thunderstorms or rain as well. The coastal and middle sectors will be mostly cloudy with the chance of slight rain or drizzle. Early tomorrow morning misty conditions will develop which may reduce visibility range.

NB: Early morning and night temperatures are expected to increase gradually across the country.

SIGNED: Central Analysis and Forecasting Office (CAFO)
