

18-HOUR IMPACT-BASED FORECAST FOR GHANA

Weather Forecast Risk Matrix

Sector	Minimum Temperature (°C)	Maximum Temperature (°C)
Coast	22	30
Forest	22	31
Transition	22	32
Northern	23	32

SUMMARY: As stated in the earlier updates, the rainstorm currently producing thunderstorms with rain over parts of the northern sector is expected to spread to additional areas this afternoon and into the evening. Variably cloudy conditions will prevail across the other sectors, with some parts of the middle and transition sectors likely to experience thunderstorms or rain later in the day. A few coastal and inland areas may also experience rain showers this afternoon.
