SUB-SEASONAL TO SEASONAL FORECAST IN GHANA

Advisory

- For the 1st week, below normal rainfall is expected in the Transition zone and the Southern sector. Individuals are advised to ensure the prudent use of available water resources. The Northern Sector of the country is expected to experience above normal rainfall this week - avoid staying near rivers, low-lying areas, and locations prone to flooding during rainfall.
- Generally, the country is expected to experience below normal temperatures; warm clothing is advised, particularly during early mornings and evenings.
- As the period progresses into the 2nd week, below normal rainfall is expected in the Southern sector of the country, while the Northern sector and the Transition zone are likely to record above normal rainfall - Keep drainage channels, gutters, and culverts free from rubbish and other obstructions.
- Above normal temperatures are expected in the Savannah, Bono East, Bono, Eastern, Volta, and Greater Accra regions – staying hydrated is advised.
- **The public is encouraged to stay informed by following daily weather updates from the Ghana Meteorological Agency.**
