SUB-SEASONAL TO SEASONAL FORECAST IN GHANA

Advisory

- For the 1st week, above normal rainfall is expected in the Northern sector and the eastern parts of the Southern sector of the country - avoid staying near rivers, low-lying areas, and locations prone to flooding during rainfall.
- Generally, the country is expected to experience below normal temperatures; warm clothing is advised, particularly during early mornings and evenings.
- As the period progresses into the 2nd week, below normal rainfall is expected in areas along the coast - Individuals are advised to store water whenever it rains and ensure prudent use of available water. The rest of the country is likely to experience above normal rainfall - Keep drainage channels, gutters, and culverts free from rubbish and other obstructions.
- Above normal temperatures are expected generally across the country – staying hydrated is advised.
- **The public is encouraged to stay informed by following daily weather updates from the Ghana Meteorological Agency.**
