SUB-SEASONAL TO SEASONAL FORECAST IN GHANA

Advisory

- For the 1st week, below normal rainfall is expected across the country - road users are advised to exercise caution on dusty roads, particularly where reduced visibility may occur.
- Above normal temperatures are expected across the country, except for parts of the Central and Greater Accra regions, where below normal temperatures are likely to occur. Residents are advised to stay hydrated and limit sun exposure during peak afternoon hours. In areas where below normal temperatures are expected, residents are advised to wear warm clothing, particularly during the early mornings and evenings.

- As the period progresses into the 2nd week, below normal rainfall is expected in the southern coastal belt- Individuals are advised to store water whenever it rains and ensure prudent use of available water. The eastern and central parts of Southern Ghana, including the Bono East, Oti, Ashanti, Eastern, Ahafo and Western North regions, are likely to experience above normal rainfall. Residents are advised to avoid staying near rivers, low-lying areas, and locations prone to flooding during rainfall.
- Above normal temperatures are expected generally across the country – staying hydrated is advised.

- **The public is encouraged to stay informed by following daily weather updates from the Ghana Meteorological Agency.**
