Coast	24	33
Forest	23	35
Transition	23	35
Northern	25	39

SUMMARY: Mist or fog patches may develop over the mountainous and forest areas during the early hours potentially reducing visibility amidst cloudy conditions and possible rains along the coast and inland areas this morning. As the day advances sunny conditions will dominate most areas in the country with occasional cloud cover for some areas in southern Ghana. Thunderstorms with rain are likely over the few inland areas of the coast, parts of the middle and transition sectors from late afternoon into the evening. Slight haze is also expected over the upper regions throughout the forecast period.
