

INLAND WATER IMPACT-BASED FORECAST

WEATHER SUMMARY

Variably cloudy weather is forecast across most of the southern half of the lake from the evening until the morning, however, there is a 30% chance of rain with or without thunderstorms over the lake's extreme southern regions tonight. Mist is predicted to build in some places, reducing visibility in the early morning hours. The current dry and hazy conditions will linger over tonight's northern half until the forecast period's conclusion.
