

24-HOUR FORECAST FOR GHANA VALID FROM 6AM TODAY

SUMMARY: Mist and fog patches are forecast to form this morning over coastal, forest, and mountainous areas, with a slight chance of localized rain showers along parts of the coast. Later in the day, mild hazy conditions are expected, particularly over southern Ghana, with the possibility of rain showers over the west coast and some inland areas. Dry and hazy weather will dominate the northern and transition zones throughout the forecast period, with visibility ranging from **500 meters** to **9000 meters** across the country.

CAUTION!

1. **Naked fires should be handled cautiously to prevent any form of fire outbreak due to the dryness in most parts of the country.**
2. **Motorists are advised to use fog lights and drive within appropriate speed limits due to deteriorated visibility.**
